Delhi, India

SUMMARY

AI/ML undergraduate who has shipped two production-deployed, full-stack AI platforms (FastAPI + LLM APIs) that cut manual workflow time by up to 90%. Strong foundation in backend development, NLP, and Generative AI, with hands-on experience across the stack from API design to deployment. Former Club Head of the Cloud Computing Club at Galgotias Tech Council, growing technical community engagement by 40%+. Seeking SDE / AI/ML internship opportunities.

EDUCATION

Galgotias University, Greater Noida, Uttar Pradesh

2024 - 2028

B.Tech in Computer Science and Engineering (AI & ML) | CGPA: 8.0

PROJECTS

SentinelChain - Autonomous Supply Chain Resilience Platform

Jul - Aug 2026

Next.js, React, Tailwind CSS, Three.js, Groq API, SAP S/4HANA, SAP Ariba, NewsAPI | [GitHub \(Live\)](#)

- Architected a multi-agent GenAI pipeline (Detection, Impact, Match & Chase, Execution) that autonomously detects semiconductor supply-chain disruptions and drafts procurement responses, compressing a 2-week manual resolution process to under 2 minutes.
- Connected SAP S/4HANA Cloud OData APIs to explode Bills of Materials in real time, calculating exact dollar-level revenue-at-risk (e.g., \$14.2M/day exposure on a single disrupted line) across multiple plants and product lines.
- Built a live sourcing engine against the Mouser Electronics API with zero hardcoded data, enforcing enterprise guardrails ($\pm 10\%$ price ceiling, 95% evidence-confidence gate) before auto-generating SAP Ariba purchase requisitions.

ContentFlow AI

Mar - May 2026

Python, FastAPI, NLP, JavaScript, Reddit API, yt-dlp | [GitHub \(Live\)](#)

- Designed a 4-agent AI pipeline automating content discovery, trend validation, script generation, and viral hook creation using real-time Reddit and YouTube data, cutting manual research time by 90% and scripting effort by 85%.
- Built an NLP-powered Hinglish content generation engine with weighted engagement scoring and competitor analysis, improving content selection accuracy by 70% and generating creator-ready scripts in under 10 seconds.
- Built and deployed scalable REST APIs (FastAPI) with frontend/backend on Vercel and Render, removing dependency on external LLM APIs and cutting operational costs by 100%.

TECHNICAL SKILLS

Languages: C++, Java, Python

AI / ML: Generative AI, Machine Learning, NLP, Prompt Engineering, RAG, LangChain

Backend: FastAPI, Django, REST APIs, API Integration, JDBC, Servlets

Frontend: HTML, CSS, JavaScript

Databases: MongoDB, MySQL

Tools & Platforms: Git, GitHub, Linux, VS Code, Apache Tomcat, Vercel, Render, SolidWorks

CS Fundamentals: DSA, OOP, DBMS, Operating Systems, Computer Networks

CERTIFICATIONS

- | | |
|--|----------|
| • Oracle Database SQL - Oracle Academy | Nov 2025 |
| • Programming with Java - GUVI (HCL) | Aug 2025 |
| • Cloud Computing Fundamentals - Infosys Springboard | Sep 2025 |
| • Design Thinking - NPTEL | Jan 2026 |

LEADERSHIP & ACHIEVEMENTS

- Former Club Head, Cloud Computing Club - Galgotias Tech Council: drove 40%+ growth in technical community engagement through cloud workshops and open-source bootcamps.
- Infrastructure Optimization: engineered zero-cost local LLM deployment pipelines for active full-stack applications.
- Open Source & Problem Solving: maintained an active, production-backed GitHub footprint alongside consistent algorithmic practice on LeetCode.
